"A bold declaration with a brave vision"

– World Vision

For many families in developing countries, the joyful experience of having an abundance of food, leaving the table with a full stomach, and sharing food with those you love, is not an every day experience. The World Vision food support program has been initiated in more than 50 countries globally through the implementations of:

- **4,088 gardens** to grow food for families, communities, and schools
- Food distribution of **111,088 metric tonnes** to children and families
- Nutritional programs for **151,157 malnourished children**
- Food aid for **3.6 million people**

Food security is when all people have continuous access to enough nutritious, safe, personally acceptable, and culturally appropriate foods, which are produced in ways that are environmentally sound and socially just.

The word **sustainability** is key to this World Vision established food program.

As donations are made, World Vision is able to develop this program that is continuously growing to help countries around the world.

World Vision helps families achieve food security by:

1. Increasing agricultural productivity through improved seed and farming practices
2. Improving access to markets so farming families can sell their surplus of food
3. Teaching families and communities about nutrition
4. Maintaining sustainability through the management of resources for long-term improved nutrition

OUR MISSION: THE UNIVERSITY OF OTTAWA WORLD VISION CLUB IS A STUDENT RUN NON-PROFIT ORGANIZATION THAT SEEKS TO RAISE FUNDS AND AWARENESS ABOUT THE DEVELOPMENTAL ISSUES AROUND THE WORLD AND TO PROMOTE WORLD VISION CAMPAIGNS IN CANADA.
